Fund overview

ISIN LU0344579056	Valor 3750371	Bloomberg JPMGHAU LX
----------------------	------------------	-------------------------

Investment objective: To achieve a return in excess of global bond markets by investing primarily in global below investment grade corporate debt securities, using derivatives where appropriate.

Investment approach

- Uses a globally integrated research driven investment process that focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers.
- Bottom-up security selection approach based on assessing relative value across the global developed market high yield credit spectrum.

PERFORMANCE DISCLOSURES

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

See the material risks, general disclosures and definitions on pages 2 & 3.

Shares of the Sub-Fund will fluctuate in value.

Failure to meet the Sub-Fund's objective.

GENERAL DISCLOSURES

This is a marketing communication.

Before investing, obtain and review the current prospectus, Key Investor Information Document (KIID) and any applicable local offering document. These documents, as well as the annual and semi-annual reports and the articles of incorporation, are available free from your financial adviser, your J.P. Morgan Asset Management regional contact, the document issuer (see below) or at www.jpnam.ch.

JPMorgan Asset Management (Switzerland) LLC herewith informs investors that with respect to its distribution activities in and from Switzerland it receives commissions pursuant to Art. 34 para. 2bis of the Swiss Collective Investment Schemes Ordinance dated 22 November 2006. These commissions are paid out of the management fee as defined in the fund documentation. Further information regarding these commissions, including their calculation method, may be obtained upon written request from JPMorgan Asset Management (Switzerland) LLC, Dreikönigstrasse 37, 8002 Zurich.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information. No warranty of accuracy is given and no liability in respect of any error or omission is accepted.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmorgan.com/emea-privacy-policy. For additional information on the sub-fund's target market please refer to the Prospectus.

Maturity Date refers to the maturity/reset date of the security. For those securities whose reference coupon rate is adjusted at least every 397 days, the date of the next coupon rate adjustment is shown.

The yield displayed is in the base currency of the Sub-Fund. Actual share class yields may differ from the displayed yield due to currency effects.

DEFINITIONS

Correlation measures the relationship between the movement of the fund and its benchmark. A correlation of 1.00 indicates that the fund perfectly matched its benchmark.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta a measure of a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant.

Annualised volatility (%) an absolute measure of volatility and measures the extent to which returns vary up and down over a given period. High volatility means that the returns have been more variable over time. The measure is expressed as an annualised value.

Sharpe ratio measures the performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio (IR) measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
